Objective

Enthusiastic and results-driven Frontend Developer with 1.5 years of hands-on experience in software development. Proficient in ReactJS, Material UI, and Redux. I have a proven track record of delivering high-quality projects that blend innovation with user-centric design. Accomplished 1st place in Inter-College Hackathon and secured three awards within a year for outstanding contributions to the organization. Eager to bring my technical expertise, creativity, and passion for coding to a dynamic SDE role where I can contribute to cutting-edge projects and continue to excel in a collaborative environment.

Experience

Hashedin by Deloitte   14 Nov 2022 - Currently Working
Integration Engineer
  - Worked to rapidly complete projects in accordance with customer demands.
  - Participated in every stage of software development, including gathering requirements, designing, implementing, and testing.
  - Also, won two spot awards for my hard work as frontend developer and Top Impactor Award for my performance within 1st year.

Hashedin by Deloitte (Internship)   2nd May 2022 - 13th Nov 2022
Integration Engineer
  - During my internship, I gained hands-on experience with ReactJS, a modern JavaScript library for building user interfaces.
  - Also learnt sql, github and Redux for state mangement. I actively participated in developing a comprehensive E-COM project, where I played a key role in designing interactive components, implementing state management, and ensuring smooth user experiences.
  - This training not only enhanced my proficiency in ReactJS but also provided valuable insights into the software development lifecycle and effective teamwork within a technical environment.

Qubit Capital (Internship)   24th May 2021 - 6th Aug 2021
Frontend Intern
  - Most important challenge was to convert existing code into reusable components so that code can be reused and works efficiently.
  - Participates in planning enjoyable events for Friday evening.

Parva (Internship)   7th Mar 2021 - 7th May 2021
Frontend Intern
  - Parva is basically a social platform for organizing events offline and online.
  - I handled frontend using Reactjs. My key job was to fix existing bugs and work on new features.

Education

Trident Academy Of Technology   2018-2022
Computer Science Engineering

Jindal School   2017-2018
Secondary School (CBSE)

St. Mary's School   2015-16
Matriculation (ICSE)

Skills

- Javascript
- ReactJS
- Redux
- Material UI/Bootstrap
- GitHub/Bitbucket
- Python
- MongoDB

Projects

- **DNA Dashboard**
  - DNA dashboard is basically a HR tools to manage activities like Profile Info, Leave Management, Performance and Increment, Volunteer etc.
  - I worked there as frontend developer making components as per client demands and writing test case using Jest.
  - Technologies: ReactJS, django, Postgres, Material UI, Graphql and Jest.

- **Elevance Portal**
  - It is a portal having tablular information about hospital claims and patients and insurance information etc.
  - I worked to maintain the dashboard and fixing the existing bugs.
  - Technologies: ReactJS, django, Postgres, Bootsrap.

- **Draw to Deploy**
  - D2D is the platform where you can give information and using terraform, infra-structure will be created.
  - I worked on making authentication system, excel to text conversion and fixing some UI bugs making the user experience smooth.
  - Technologies: ReactJS, django, Postgres, JWT, Material UI, Terraform.

- **VidShot (Personal)**
  - VidShot is the replica of youtube with different UI. It allows user to upload video, delete, like comment on video.
  - Site: https://vid-shot-aabidkhan0786.vercel.app
  - Technologies: MERN, Redux, Bootstrap, CryptoJS, Axios, JWT, firebase.

- **Asocials (Personal)**
  - aSocial is the replica of modern world social media with interactive UI.
  - Site: https://a-socials-client.vercel.app
  - Technologies: MERN, Redux, Bootstrap, CryptoJS, Axios, JWT, firebase.

Achievements & Awards

- **Trithon**
  1. Trithon is a non-stop 24-hour hackathon that welcomes participation from colleges throughout the odisha.
  2. I worked on the front end using ReactJS which employed AI to identify fake Indian documents and cash.

- **Top Impactor Award**
  1. For over all performance in a year, I got this award for exceptional performance and impactful contributions as frontend developer.

- **Excellence Award**
  1. I was honored with the Excellence Award in recognition of my significant contributions to a client project, Elevance Portal.
  2. My dedication and efforts played a pivotal role in delivering exceptional results, which included innovative solutions, effective problem-solving, and a proactive approach to meeting the client's needs.

- **Rising Star Award**
  1. This Award signifies as a fresher in D2D project, I have outperform the team and achieve outstanding results within a dynamic software development environment.
  2. I consistently delivered high-quality code, streamlined processes, and collaborated effectively with cross-functional team to meet the business needs.
